caArray

Highlights of caArray 2.3.1 released on 2/2/2010

The release notes can be found at

https://gforge.nci.nih.gov/frs/download.php/8183/caarray_release_notes_2_3_1.txt.

- This release represents a feature release of the caArray 2 software. Highlights of caArray 2.3.1 are:
 - ◆ Export to GEO: Affymetrix single-channel CHP experiments
 - ◆ 17972: Allow deletion of already imported but not parsed data files
- A production version of caArray 2.3.0 is available on the NCI CBIIT production server: array.nci.nih.gov.

calIntegrator2

Highlights of calIntegrator2 v1.0.1 released on 01/13/2010

- Addition of a new Visible parameter for Study Managers to select how data annotation is shown to Study Investigators.
- Study Investigators can create Lists of Genes and save them for use in Analysis workflows.
- A new capability for searching pathway data in caBio, and for creating gene lists from pathway search results.
- A new capability for searching gene symbols in caBio, and for creating gene lists from search results.
- A new capability for using multiple keywords in all caBio searches.
- Corrected links for support and contact.
- Interface to GenePattern grid-based modules now provides a link for downloading GCT and CLS files.
- Option to upgrade to newer versions of calIntegrator2 without removing existing study data and user data.
- Study Managers can now add customizable external links, which are displayed as part of the study.
- Details are in the [\[release note\]](#)
